SUMMARY

Informatics Engineering graduate (GPA 3.72/4.00, Magna Cum Laude) from Universitas Budi Luhur with hands-on full-stack experience building a production-style e-commerce platform end to end. Comfortable working across the stack, from designing relational database schemas, JWT authentication, and payment integrations on the backend (NestJS, Prisma, PostgreSQL) to building responsive interfaces and state management on the frontend (Next.js, Redux Toolkit). Looking to grow as a Full-Stack Developer in a team where I can keep sharpening these skills on real-world problems

PROJECT

E-COMMERCE PLATFORM (FULL-STACK) - Personal Learning Project

Stack: NestJS, TypeScript, Prisma ORM, PostgreSQL (Neon), Next.js 16, React 19, Redux Toolkit, Stripe API

- Built a full-stack e-commerce application with NestJS + TypeScript on the backend and Next.js 16 (App Router) + React 19 on the frontend, organized into 7 domain modules (auth, users, products, categories, carts, orders, payments).
 - Implemented dual-token JWT authentication (15-minute access token + 7-day refresh token) using Passport.js strategies, with hashed refresh tokens and role-based access control (RBAC) via custom Guards and Decorators.
 - Integrated the Stripe payment gateway with a create-intent → confirm-payment flow, automatically syncing order and cart status after a successful transaction.
 - Designed a relational schema (7 models) in PostgreSQL via Prisma ORM, applying cascade/restrict delete rules, indexing, and atomic transactions to prevent race conditions in cart operations.
 - Built the frontend state layer with Redux Toolkit and redux-persist, and configured Axios interceptors for automatic JWT refresh and request retry on token expiry.
 - Developed a product catalog with search, category filtering, and pagination; a multi-step checkout flow with Stripe Elements; and role-based UI rendering for admin vs. regular users.
-

BOOTCAMP EXPERIENCE

Feb 2022 – Jul 2022

INDEPENDENT STUDY PROGRAM - KAMPUS MERDEKA

Certified by the Ministry of Education, Culture, Research, and Technology of Indonesia.

Bootcamp in Fullstack Web Development, Dicoding Academy.

- Completed a government-certified bootcamp program focused on Front-End and Back-End Web Development.
 - Gained hands-on experience with HTML, CSS, JavaScript, ReactJS, Node.js, Express.js, and MongoDB.
 - Developed and deployed web-based applications as part of final projects
 - Enhanced technical skills, teamwork, and problem-solving through collaborative learning.
-

VOLUNTEER EXPERIENCE

Jul 2024 – Aug 2024

VOLUNTEER DATA ENTRY - COMMUNITY SERVICE POLIO NATIONAL IMMUNIZATION

Jakarta Health Department (Dinas Kesehatan Provinsi DKI Jakarta)

- Supported a public health campaign for Polio National Immunization Week.
 - Assisted medical staff by inputting and verifying thousands of vaccination records into the official health information system.
 - Contributed to improving data accuracy and efficiency in vaccination reporting.
-

EDUCATION

UNIVERSITAS BUDI LUHUR - JAKARTA, INDONESIA (2021 – 2025)

Bachelor ' s Degree in Informatics Engineering

GPA: 3.72 / 4.00 (Magna cum laude)

SKILLS

Frontend Development: JavaScript (ES6+), Typescript React.js, Next.js (App Router), Redux Toolkit
Tailwind CSS, SCSS Modules, diasylUI, Bootstrap, HTML5, CSS3,
Responsive Web Design.

Backend Development: Node.js, NestJs, Express.js, RESTful APIs, JWT & Passport.js, RBAC
class-validator/class-transformer, Bcrypt, MVC, Swagger/OpenAPI

Database & ORM: PostgreSQL (Neon), Prisma ORM, MongoDB (Mongoose), MySQL

Payment Integration: Stripe API (PaymentIntent, Stripe Elements)

Tools & Others: Git, Github, Docker Desktop (Basic), Linux (Basic), Vercel Jest, Figma, Postman

Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Fast Learner.
